

## 2025 Doctoral Research Residency Program

### Application guidelines for PhD students enrolled in affiliated universities

Applications to the CCA Doctoral Research Residency Program for PhD students enrolled in universities from our affiliated network must be nominated by their respective home institution. Applications and nominations should be sent by email to [studium@cca.qc.ca](mailto:studium@cca.qc.ca), and should follow internal deadlines set by individual departments and schools. Complete applications should include the following documents:

- **Application form completed** through the [CCA online application portal](#)
- **Abstract of PhD project** (500 words), including the name(s) of the supervisor(s)
- **Research Proposal** (500 words), identifying the items of interest in the CCA Collection, as well as contributions to the CCA's lines of investigation
- **Curriculum Vitae**, detailing education, professional experience, publications, awards, and working languages, as well as any other relevant information

Applications will be reviewed by the CCA and the Coordinators of the respective doctoral programs and should be received by **31 January 2025, at 11:59pm (EST)**. Final selections will be made by the CCA in collaboration with the program directors.

Notification date: March 2025

### Eligibility and Terms of Residency

The Doctoral Research Residency Program provides a stipend of CAD 2 000–3 000 to cover living expenses of each recipient for a residency in Montréal. The stipend is non-renewable.

Residencies at the CCA—ranging from four to six weeks, with the length determined by each affiliated university—must take place between 9 June and 29 August 2025. Attendance at the one-week seminar—a topical “Toolkit for Today” that takes place in the summer and provides scholars with new concepts, tools, and methods for their own research—is required (Monday 14 to Friday 18 July 2025).

Candidates will be selected according to a set of criteria, including the originality and relevance of the proposed research, and how it relates both to the overall PhD project and to the CCA's main lines of investigation.
