Montreal is a city of light. What was once a city filled with greed, corruption and lies, is now a place filled with morality and truth. Equality comes from transparency. Public social media command centers collect real time movement and statistics so that city-dwellers can easily follow their fellow citizens. Technology becomes the eye by which we are constantly surveyed, the mediator between citizens and the city. There is no lust for power when there is no power to be held. The city is self-governing, the population is self-justifying and our gaze is omnipresent. If you have nothing to hide, you have nothing to fear. The reality of our lives is only good and true in the light of the public eye.
There is no darkness when everything is illuminated.
